M E M O R A N D U M

TO: BOSTON REDEVELOPMENT AUTHORITY

FROM: ROBERT T. KENNEY, DIRECTOR

SUBJECT: CAMPUS HIGH SCHOOL PROJECT, MASS. R-129
John Eliot Square Improvements

On October 31 the Authority approved a minor modification to the Campus High School Urban Renewal Project allowing for the development of parks and right-of-way improvements in John Eliot Square. At the present time Green Engineering Affiliates, Inc. under Contract to the Boston Redevelopment Authority for all Site Improvement work in the Campus High School Area, desires the approval of Stull Associates, as a sub-contractor to provide master planning and design services for all surface improvements in the John Eliot Square Area.

Stull Associates, a Local Architectural Firm, has been active in the Roxbury Community for many years and has been intimately involved in the planning with local groups and developers for the improvement and preservation of the John Eliot Square, Kittredge Square and Fort Hill Historic Areas. Stull Associates have recently prepared and published a master design plan for these areas which is being used as a guideline for current and future development by local development groups and community leaders including the Roxbury Action Program who are developing over 200 units of new and rehabilitated housing adjacent to the Square.

It is by request of the community and with the consent of Green Engineering Affiliates, Inc. that Stull Associates, Inc. be approved as a sub-contractor to prepare the master plans for the Site Improvements in the John Eliot Square Area for the sum of $45,000.00.

It is, therefore, recommended that Stull Associates, Inc. be approved as a sub-contractor to Green Engineering Affiliates, Inc.

VOTED: That Stull Associates, Inc. be approved as a sub-contractor to Green Engineering Affiliates, Inc. in the Campus High School Urban Renewal Area, Mass. R-129.
